## **1. PURPOSE**

The preparation of this report originated from the need to consolidate official documents which constitute the Lopez Canyon Landfill closure construction plans, as well as, the Closure and Post closure Maintenance Plans. A report format was selected as a way to present the information in a logical and sequential manner. Electronic copies of all plans and correspondence referred to in this summary are available by clicking the link provided.

The types of documents listed include the following:

- Closure Construction Plans
- Closure / Post Closure Maintenance Plans
- Correspondence with regulators affecting the plans
- Closure certification and recordation documents
- Tables summarizing the content of each closure/maintenance binder submitted (including land use references)

This document does not include the Construction Quality Assurance (CQA) reports, which have already been submitted and approved by CalRecycle as required for final closure certification. CQA Reports include records of daily field reports, photo logs, daily monitoring of dirt usage, soil compaction percentage and moisture content test data; and preparation of the record drawings showing field test locations.
